I urge the FCC to reject the NAB's petition 04-160 to limit XM's ability to provide you with "locally oriented" content. XM provides a much appreciated service - an uninterrupted radio signal across the country. Including news, music, entertainment, and local traffic and weather reports. I still listen to local radio stations when they have a good program and when I can get a clear signal. There are many areas where a clear signal is not available. Sometimes all I want to hear is the traffic report, or the news, without the commercial breaks or comments, and without having to wait for 10 minutes until they get repeated again. I have been listening to XM Radio for over 18 months and I want them to be able to provide this service, including "locally oriented" content, in the future.
